| ADVANCED TACTICAL AND SURVEILLANCE RADARS | ELECTRONIC WARFARE SYSTEMS | SPACE-BASED SENSORS |

Great talent: engineering capabilities

Skilled systems, software, hardware and whole life engineering teams that focus on:

- Industry-leading space-enabled information solutions that support areas such as Earth observation, intelligence gathering and surveillance, advanced missile warning and space protection
- Multispectral, multifunction electronic warfare solutions including airborne electronic attack, signal intelligence and battle management
- Secure integrated sensor solutions including active electronically scanned array radar systems, and GPS and navigation systems
- Emerging and disruptive solutions for advanced sensors, algorithms and analysis products
