

EAGLE Logistics Suite

Enhanced Automated Graphical Logistics Environment

Keeping product support simple.

EAGLE Logistics Suite is a world-class integrated logistics support (ILS) tool. It provides a unique environment where design, logistics support, configuration and maintenance information can be reused from a common source database to produce logistics product data (LPD) through the life cycle of the product. Once entered into your EAGLE database, details are shared across applications.

EAGLE Logistics Product Data

- Integrated LSA tool
- FME(C)/RCM
- Provisioning
- Task analysis
- Illustrated parts breakdown
- LSA reports
- Query wizard
- GEIA-0007, MIL-STD-1388-2B, Def-Stn-0060, S3000L

EAGLE Portal and Vision Portal

- Online review and comment tool
- PDF or IETM/P
- Attach file to comments
- Comments update EPS

Vision

- IETM/P viewer
- Online or offline
- No CGM file viewer plugin required

EAGLE Publishing System

- Everything in one install: CSDB, content editor, publication module editor, PDF documentation generator
- Generate technical data for IETMs and preview in several options
- All issues of S1000D, F-35, MIL-STD-40051-1A and MIL-STD-3001
- Use SGML/XML editor with PDF view to validate content quickly
- Reuse EAGLE LSAR data to populate data module work packages
- Publish to viewer of choice, EAGLE Vision, PDF and custom style sheets
- Work-flow driven with controls to assist with division of labor
- Custom project status for data modules plus completion status reports
- Assists author in creating references to internal and external objects
- Continually checks schema validity and conformance with rules

Maintenance Management Information System

- Web-based support for fielded products
- Inventory and warehouse management
- Preventive and scheduled maintenance management
- Configuration management
- Work orders
- Engineering change management
- Failure investigation

Training and consulting

- Various options for customization are available
